## Address

Gyalpozhing , Mongar district

## Profile Info

My name is Ugyen Wangchuk and I am currently pursuing Bachelor of Science in Computer Science at Gyalpozhing College of Information Technology. Ever since I was a small kid, i was really interested to learn about the technologies from where it really aspire me and right after the completion of my high school I joined Gcit College. With a great aspiration and dreams I always look forward to enhance my skills so that it goes like a journey not jus a destination.

## Projects

Bsc.CS,Gcit

### Flood Detection System I IOT-Web application

Back then in third year , me and my team have been working on the project topic "Internet of Town" which basically was developed by using Pi-top version 4 on integration with website. The main motive of the project was to secure those risky or town areas from flood by developing the detection system using some of the IoT devices.

Bsc.CS ,Gcit

### Ugyen-Portfolio I Personal Portfolio

This project is my own personal project that i have developed in order for me to easily get connected with those customers to whom i can showcase my skills and also i could use my knowledge in a right place through this application.
